Profile Summary

Full-stack developer with hands-on experience in building web applications using **Node.js, Express, React and MongoDB**. Developed a complete e-commerce platform with user and admin functionalities including authentication, product management, and filtering. Strong interest in backend development and building scalable, maintainable applications.

Technical Skills

Languages: JavaScript, TypeScript, C, Java

Frontend: HTML, CSS, EJS, React.js, Redux, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, JWT

Database: MongoDB, Mongoose, SQL

Tools: Git, Postman, Figma

Concepts: MVC, REST APIs, Authentication, Session Management, Clean Architecture

Projects

Placement Management System

HTML, CSS, PHP, MySQL (XAMPP)

- Developed a role-based web application for managing student placements with modules for students, staff advisors, and admin.
- Implemented student registration and academic data entry for third and fourth-year performance tracking.
- Built staff advisor module to verify student records through Excel-based mark list uploads.
- Designed admin dashboard to filter eligible students based on placement criteria.
- Integrated notification system to inform selected students via portal, email, and messaging.
- Added mock test module with multiple time modes (5, 10, and 30 minutes) for student practice.

Nahar Al Rayan Website

Live Business Website

naharalrayan.com

- Developed and deployed a production-level business website for a real client.
- Built responsive UI ensuring compatibility across mobile, tablet, and desktop devices.
- Optimized performance and improved user experience through clean design and structured layout.
- Worked on deployment and hosting, ensuring smooth accessibility and uptime.

ShopCart - E-Commerce Web Application

Node.js, Express, MongoDB, EJS

- Developed a full-featured e-commerce platform with separate user and admin modules.
- Implemented session-based authentication with signup, login, logout, and OTP-based password reset.
- Built admin dashboard to manage users and products (add, edit, delete, restore).
- Designed MongoDB schemas for products, variants, orders, and users.
- Implemented product filtering, sorting, pagination, and category-based listing.
