

FARSHANA K

Full Stack Developer

📞 +91 9605934731 | ✉ farshana.shameemm@gmail.com | 🌐 Portfolio
🌐 LinkedIn | 🐙 GitHub | 💻 LeetCode

Profile Summary

Full-stack developer with hands-on experience building web applications using **React, Node.js, Express, TypeScript, and MongoDB**. Experienced in developing REST APIs, authentication systems, responsive interfaces, and maintainable backend applications. Built an educational gaming platform with **LangChain-based AI game generation**, a fashion e-commerce application, an article platform, and a PDF utility. Interested in backend development, system design, and building reliable software.

Technical Skills

Languages: JavaScript, TypeScript, C, Java

Frontend: HTML, CSS, EJS, React.js, Redux Toolkit, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT, Session Management

Database: MongoDB, Mongoose, SQL

AI: LangChain, Generative AI, AI Game Generation

DevOps & Cloud: AWS, EC2, Azure, Nginx, PM2

Tools: Git, GitHub, Postman, Figma

Concepts: Clean Architecture, MVC, OOP, SOLID, Authentication, Authorization, DSA

Projects

CodeCrush – Educational Gaming Platform

[Live](#) | [GitHub](#)

React, Node.js, TypeScript, MongoDB, LangChain, Redux Toolkit

- Developed an educational gaming platform for children featuring interactive games for mouse control, typing, object recognition, and problem-solving.
- Integrated **LangChain and AI agents** to dynamically generate Quiz, Typing, Memory, Sorting, and Catch games from user prompts.
- Implemented parent and child features including child management, progress tracking, gameplay statistics, reports, contests, and premium subscriptions with online payment integration.
- Designed the backend using **Clean Architecture, Repository Pattern, Dependency Injection, and SOLID principles**; deployed using **Azure, Nginx, and PM2**.

ArticleFeed – Article Management Platform

[Live](#) | [GitHub](#)

React, TypeScript, Node.js, Express, MongoDB, Redux Toolkit

- Developed an article platform where users can create, manage, and explore articles based on their interests.
- Added user registration, login, profile management, category preferences, and password recovery features.
- Added article interactions including like, dislike, and block, with a responsive and user-friendly interface.

PDF Extractor – PDF Utility

[Live](#) | [GitHub](#)

React, TypeScript, Vite, PDF.js

- Developed a web application for viewing PDF files and selecting specific pages for extraction.
- Added page previews and interactive page selection to make working with PDF documents simple and convenient.
- Built a responsive interface with reusable React components for smooth PDF handling.

ShopCart – Fashion E-Commerce Web Application

[Live](#) | [GitHub](#)

Node.js, Express, MongoDB, EJS

- Developed a fashion e-commerce platform with product browsing, category filtering, sorting, pagination, cart, orders, and user account management.

- Implemented session-based authentication, OTP password reset, multiple payment methods, wallet functionality, and referral rewards.
- Built product, category, variant, user, and order management functionality with MongoDB and an admin dashboard.

Nahar Al Rayan – Client Business Website
Production Client Project

[Live Website](#)

- Developed and deployed a responsive business website for a real client, optimized for mobile, tablet, and desktop devices.
- Focused on clean UI, structured layouts, usability, and production deployment.

Education

MERN Stack Development Brototype	2025 – Present
BTech – Computer Science and Engineering Government Engineering College Wayanad	2013 – 2017

Achievements

- Solved **100+ problems on LeetCode**, strengthening problem-solving and data-structure skills.
- Completed multiple technical and coding challenges as part of the Brototype full-stack development program.
